DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 19 and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent No. 6,325,390 to Sillmon.

FIGS. 4A and 4B of Sillmon illustrate a method for making a chamber assembly having a first portion (vacuum tubing section 52) and a second portion (vacuum tubing section 56) including connecting the first portion and the second portion via a U-shaped connecting member (clamping ring 62), and disposing a sealing member (O-ring 50) so that a pressing portion of the sealing member creates a sealing engagement of the chamber after connecting the first portion and the second portion (see FIG. 5A).

Allowable Subject Matter

Claims 1-18 are allowed.

Claims 20-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is an examiner's statement of reasons for allowance:

Art Unit: 2851

A wafer stage chamber assembly including a chamber seal device with a plurality of pins and a keyhole strip, a U-shaped clamp, or an inflatable o-ring, in combination with the rest of the structure and function found in these claims is not shown or taught in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments with respect to claims 19 and 23 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event,

Art Unit: 2851

however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
